

REFRACTION SCENARIO PACK

THREE NARRATIVE SKIRMISH MISSIONS • VORATH WAR BAND
CAMPAIGN

DIGITAL LEGION
EXPANSION

SCENARIO 1: THE RELIQUARY SHRINE (CONTROL & HOLD)

In the epicenter of the shattered cathedral, a singing crystal reliquary pulses with divine frequency. Both warbands march to seize its core before the resonant wave fractures the district.

- **Table Size & Terrain:** 24" × 24" or 36" × 36". Place the Reliquary Shrine terrain piece at dead center (X: 12", Y: 12"). Scatter 4–6 pieces of crystal ruins or barricades.
- **Deployment:** Both players roll a d6; winner chooses board edge. Deploy within 6" of your table edge.
- **Mission Length:** 4 Battle Rounds.
- **Scoring & Objectives:**
 - **Shrine Dominion:** At the end of each round, count models within 3" of the Reliquary. The player with more models scores **2 Victory Points (VP)**.
 - **Sacred Communion:** A model in base contact with the Reliquary may take the *Commune* action to gain +2 R instead of +1 R.
 - **Martyr's Radiance:** If a model shatters within 3" of the shrine, its controller scores **1 bonus VP**.

SCENARIO 2: HARVEST OF THE GLOW-TOUCHED (EXTRACTION & ESCORT)

Three unstable Glow-Touched crystal formations have erupted across the ruins. Their living geode cores hold the concentrated memory of the VORATH faith. Harvest them before they go critical.

- **Table Setup:** Place three 25mm Objective Markers representing Glow-Touched Nodes along the center line (left flank, center, right flank).
- **Harvesting Action:** Any model in base contact with an unharvested node may spend its action to **Harvest**. Roll a d6:
 - **2–6 (Clean Extract):** The model picks up the Crystal Core. While carrying it, the model gains **+1 R at the start of each round** due to pure radiation exposure.
 - **1 (Resonance Shock):** The node violently fractures! The model suffers 1 Wound and rolls on the Fracture Table immediately.
- **Extraction:** Escort the core off your home board edge to secure **3 VP per Core**.
- **Detonation Risk:** If a core carrier suffers a *Cataclysmic Shatter*, the core vaporizes (+0 VP) and detonates with double explosion radius (6").

CRUCIBLE OF LIGHT

SCENARIO 3 & ATMOSPHERIC RADIATION TABLES

REFRACTION RULES V1.0

SCENARIO 3: THE CATAclysmic CRUCIBLE (HAZARD SKIRMISH)

The atmosphere is saturated with radioactive celestial light. In this crucible, Refraction gain is doubled, turning every skirmisher into an unpredictable supernova awaiting detonation.

- Special Rule — Hyper-Refraction:** All sources of Refraction gain are **doubled** (Surviving a wound = +2 R; Commune = +2 R; Warlord aura = +2 R). Overloads occur rapidly!
- Mission Length:** 3 Battle Rounds of intense sudden-death skirmish.
- Atmospheric Radiation Pulse:** At the start of Rounds 2 and 3, roll a d6 on the Crucible Hazard Table:

ROLL (D6)	CRUCIBLE WEATHER EVENT	BATTLEFIELD IMPACT
1 – 2	Prismatic Gale	Rainbow ion winds buffet the table. Ranged Channel attacks suffer -1 to hit; all Move distances are reduced by 1".
3 – 4	Crystalline Resonator	The air vibrates with sacred geometry. Every model currently at R3 or higher immediately gains +1 Attack in Melee.
5 – 6	Celestial Flash	A blinding flash of raw illumination washes over the battlefield. Every model must roll a d6: on a 1, it gains +1 R instantly.

- Victory Conditions:**
 - First Blood Ascension:** The first player to successfully achieve an *Ascension* (rolling a 6 on the Fracture Table) immediately scores **3 VP**.
 - Survival:** 1 VP for each surviving friendly model at the end of Round 3.
 - Supernova Kills:** 1 VP for each enemy model destroyed by friendly Shatter blast damage.

CAMPAIGN PLAY & ROSTER PROGRESSION

When running a linked campaign across all 3 scenarios, surviving models retain their battle scars and boons:

- Transfigured Veterans:** Models that survived at R5 Stable Bloom begin subsequent games with **+1 to their Save**.
- Ascended Saints:** If your Warlord achieves Ascension in Scenario 1 or 2, they start the next game already in their Transfigured state!
