

THE ADVENTURES OF BLAZIN BEAVER

ISSUE 1

\$1.50 • OCT • For Mature Readers

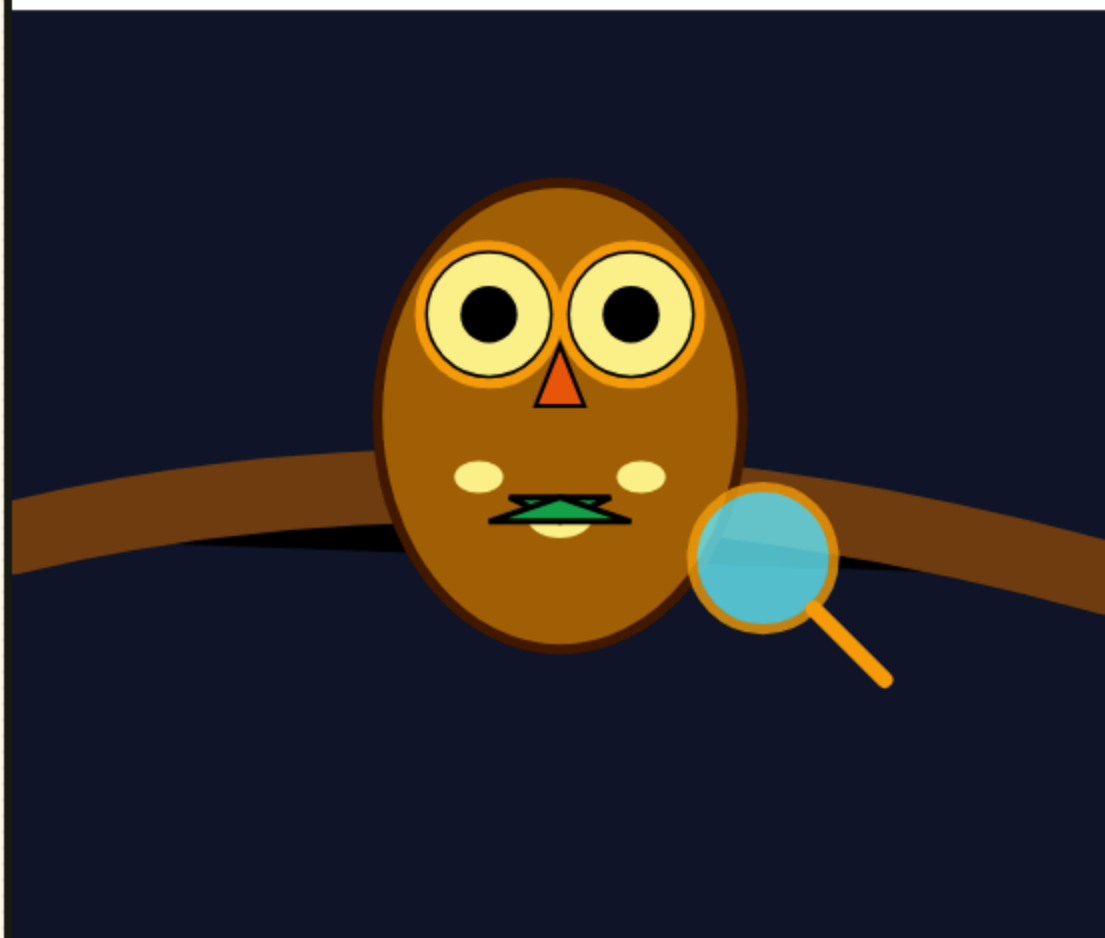

HYDRODYNAMICS MEETS PERMACULTURE. A RIVER-FED CRADLE.

BLAZE

Cold mountain water, oxygen-rich eddies, and fresh cedar sap. If you want to grow, little spark, here's your home.

THE SCHOLAR OF THE CANOPY

PROF. MYRCENE

Hoo-hoo! Astonishing, Blaze! Glandular heads four times the density of terrestrial specimens... and the aroma!

THE CELESTIAL BLOOM

PROF. MYRCENE

Beta-myrcene! Alpha-pinene! Pure linalool! An acoustic broadcast of biological tranquility!

TERPENES DON'T STOP AT PROPERTY LINES. THEY TRAVEL ON CASCADIA WIND.

WHOOOOSH...

THE TILLAMOOK SENTINEL

SNIIIIFF!

SASQUATCH

[Deep chest rumble:
Hhhrrruuummm...]

THE UNSPOKEN ALLIANCE

RESPECT.

BLAZE

Welcome to the Green Dam, big guy.
Pull up a cedar log.

10015 SW HALL BLVD, TIGARD. THE CDC DISPENSARY AT TWILIGHT.

THE CDC DISPENSARY // NORTHSTAR

NEON HUM...

BLAZE

Evening, folks. We brought the first cured harvest from the river cutting.

THE CONSERVATORY NEXUS: VORATH BRIDGE ACTIVATED

VORATH THE GREY

Greetings, Castor Fiber. The harmonic resonance of your river waters has cradled our ancestral strain beyond our greatest calculations.

VZZZZZZT!

BLAZE

She liked the fresh alder mulch, Vorath. Glad we could keep the spark alive.

THE GRAND BOTANICAL COUNCIL CONVENES

ELDRIN THE ELF

The soil mycorrhizae have fully integrated with the interstellar genetics!

BROKK THE DWARF

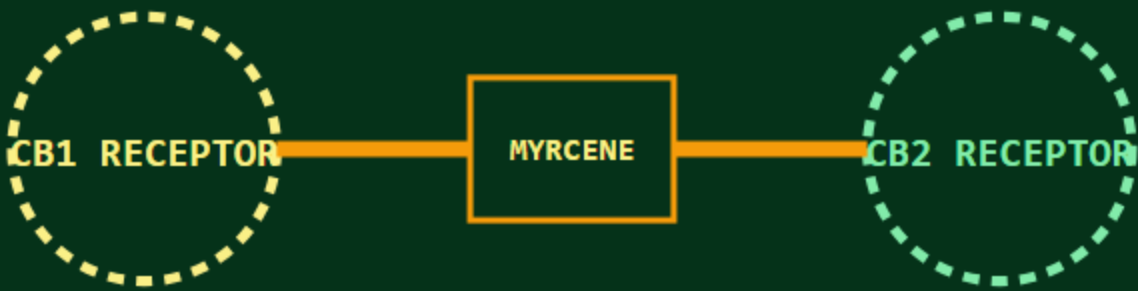

Aye, but how does the rosin press? Does it flow like golden honey at 180 degrees?

DEBATE!

RETROGRADE SIGNALING ACROSS SPECIES

Q.E.D.

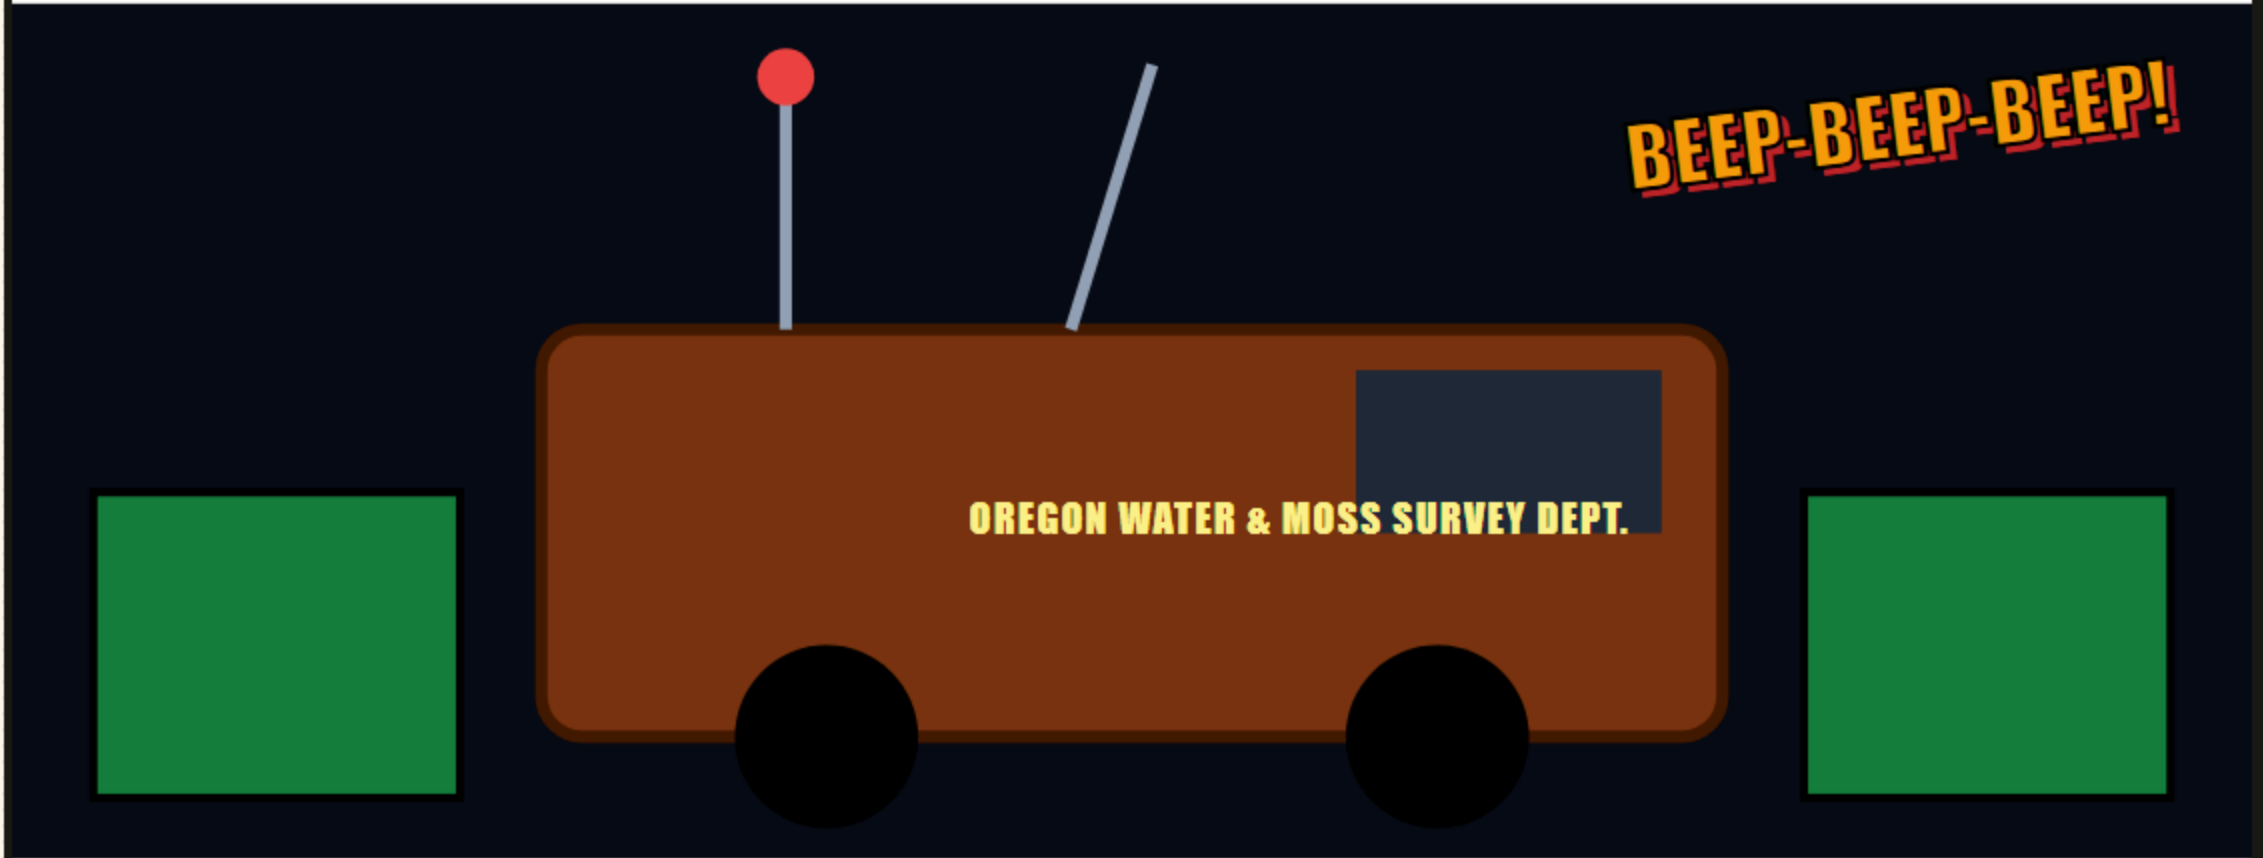

PROF. MYRCENE

When beta-caryophyllene selectively binds to CB2 receptors, systemic inflammation drops and interspecies harmony stabilizes!

BLAZE

Enough lectures for one night, Professor. The proof is in the puff.

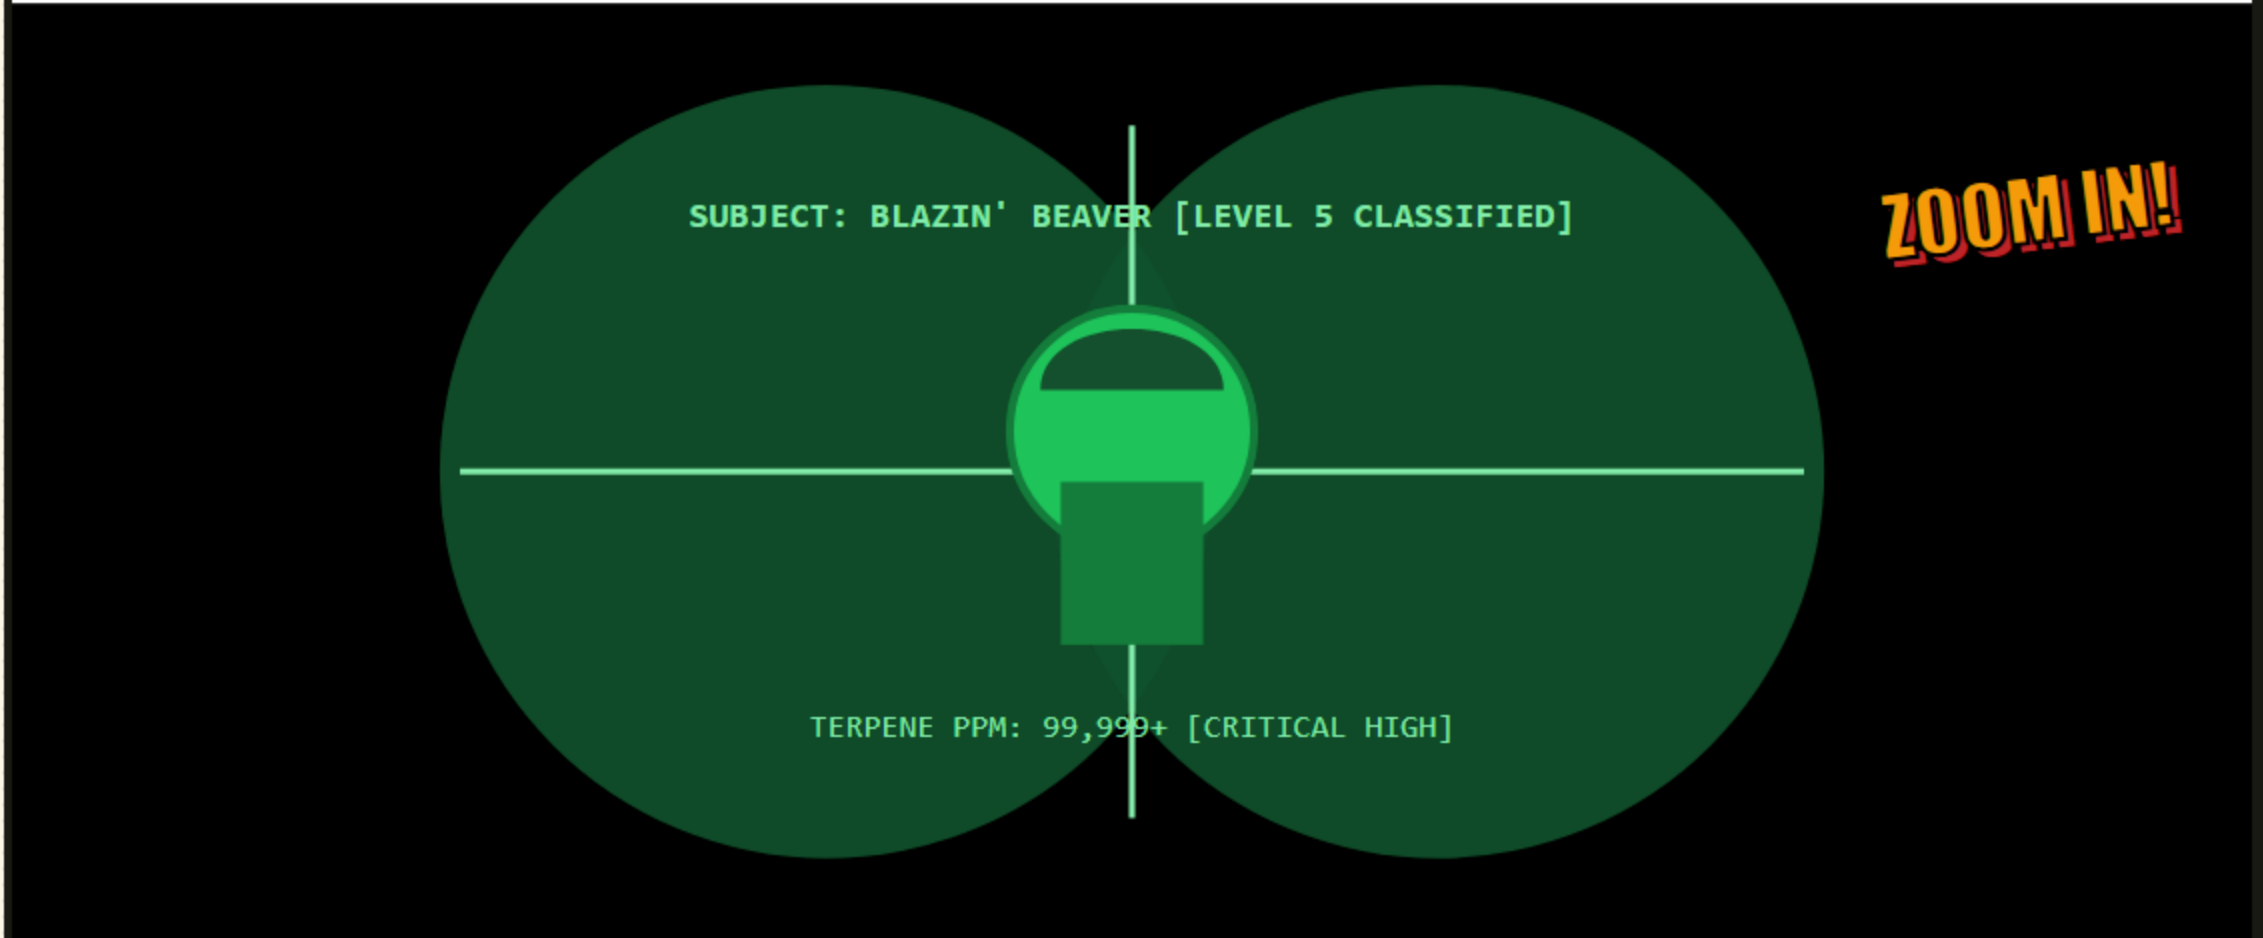

SIXTY YARDS AWAY IN A BROWN 1984 SURVEILLANCE VAN...

AGENT MOSS
Sterling! The spectrogram on that greenhouse just spiked 12,000 percent in the pine-citrus band! We have an interdimensional atmospheric disturbance!

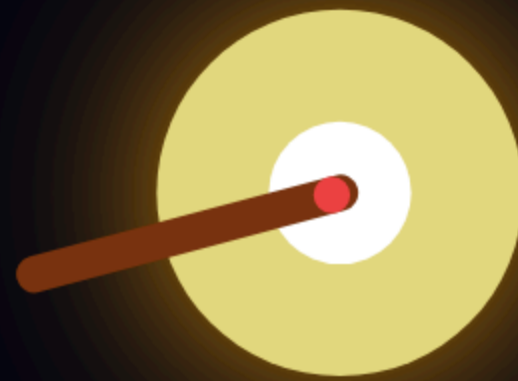

AGENT STERLING
Uh, Moss? My cousin says they just have really good craft flower in there.

TARGET IDENTIFIED: CASTOR FIBER

AGENT MOSS
Good grief... the beaver is the ringleader! Quick, get the Director on the secure line! Tell him the dam has gone cosmic!

BLAZE STEPS OUT INTO THE COOL NIGHT AIR

SKRRRTCH!

BLAZE

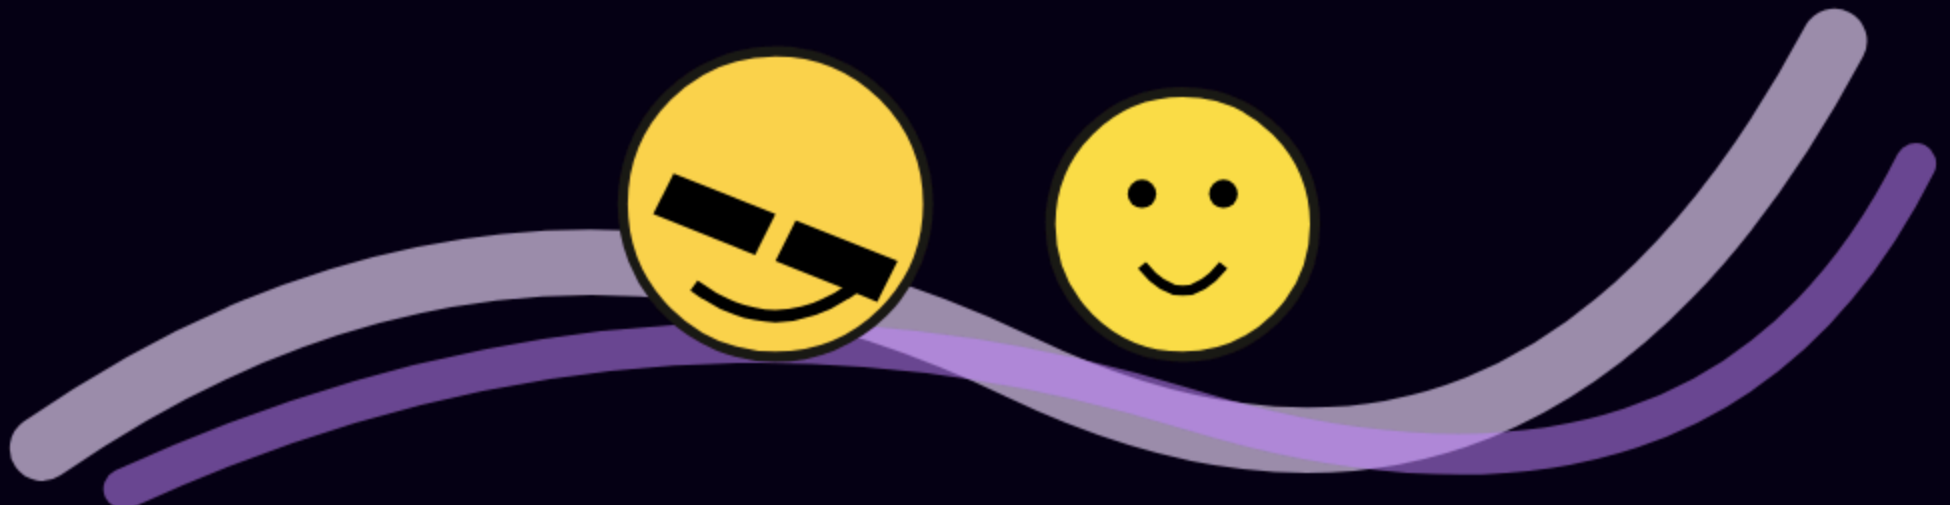

Hey, fellas in the brown van! Cold night for spying. Why don't you step out of the shadows?

RETROGRADE SIGNALING ACTIVATES: AGENT MOSS DISSOLVES

AGENT MOSS

...The chronic tension in my lower lumbar vertebrae... it's just... evaporated. Why was I yelling into a phone?

BLIIIISSSS...

BLAZE

Take a pull, Agent. The only thing we're overthrowing tonight is bad posture and high blood pressure.

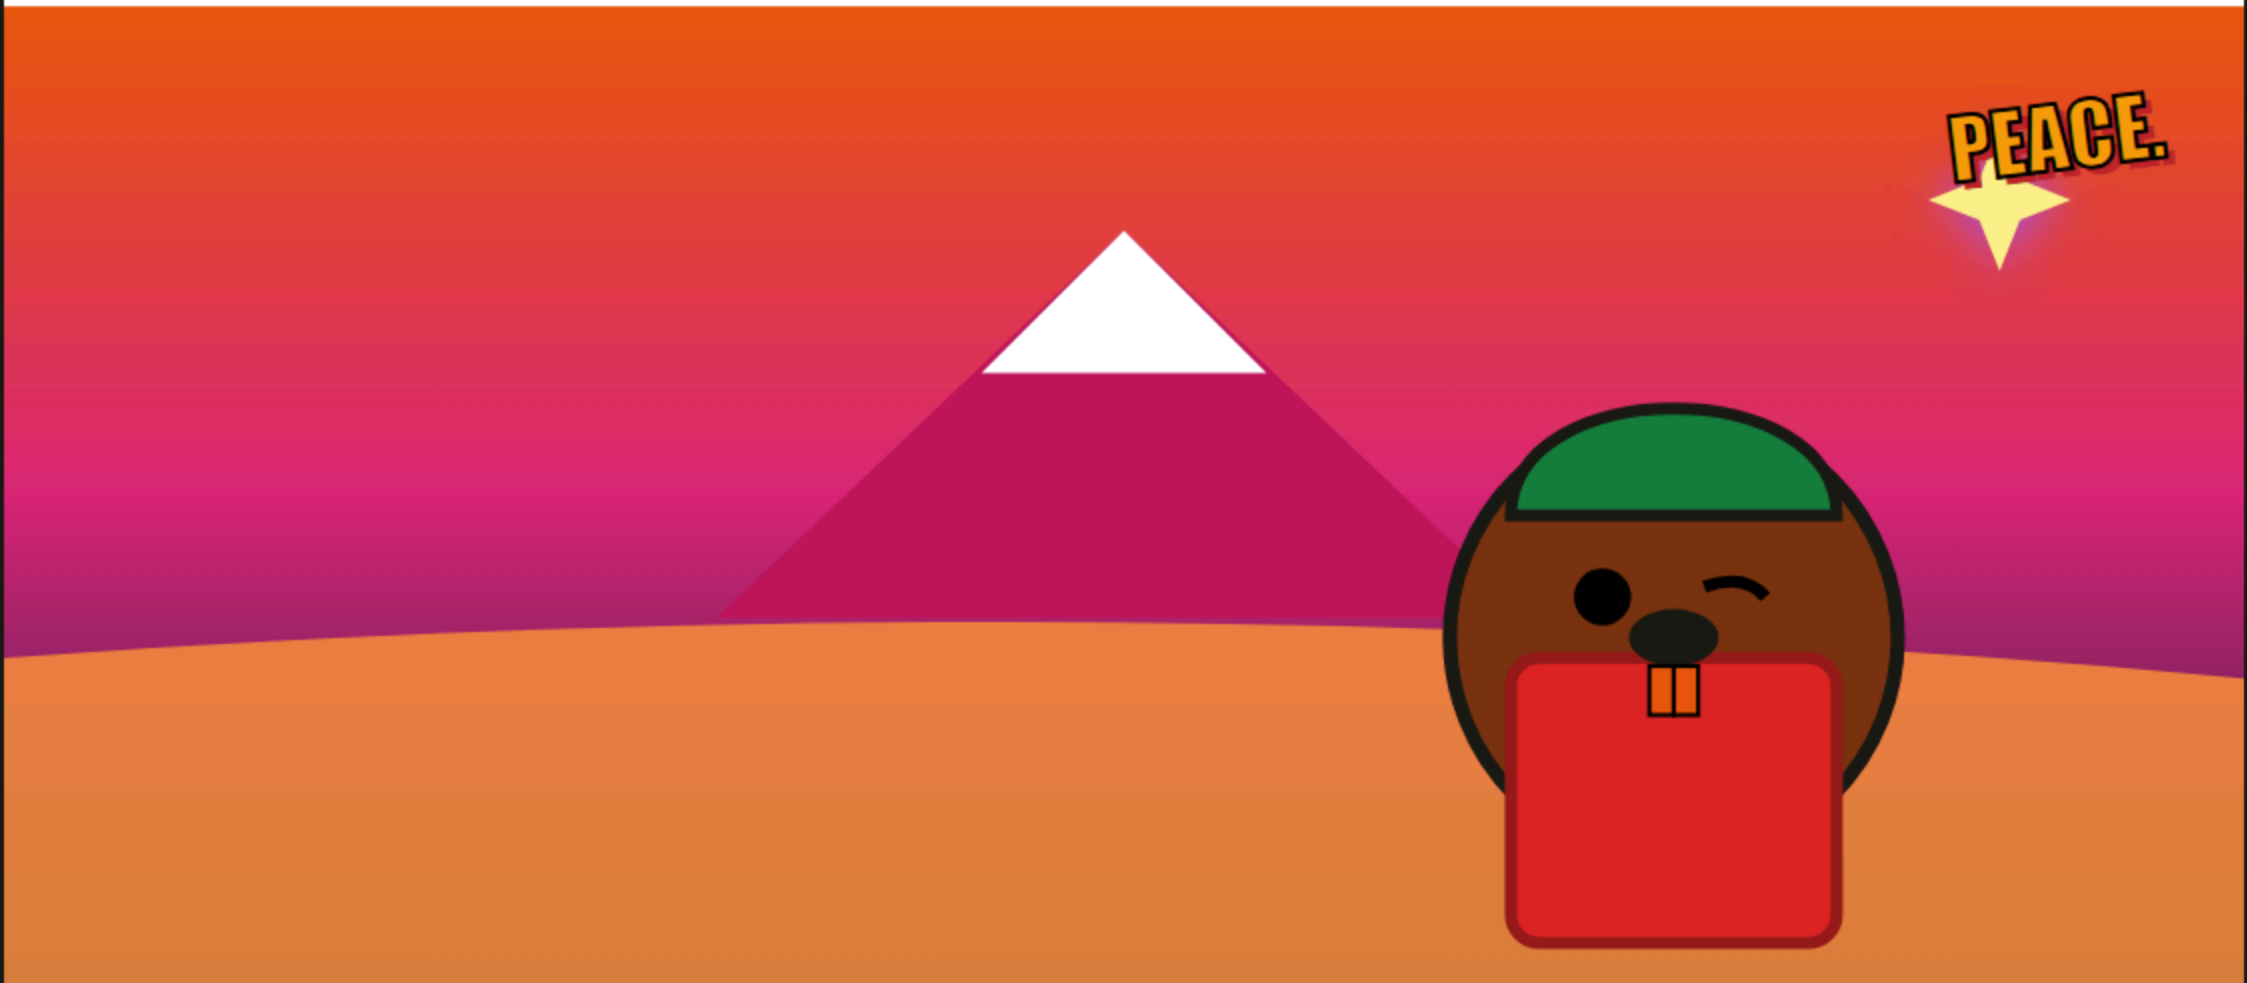

THE PERMANENT SANCTUARY DECREE

BLAZE

There. Clear enough for hikers, beavers, and flying saucers alike.

THE GREEN DAM WILL RETURN IN ISSUE #2

BLAZIN' BEAVER

Life's too short to hold tension, neighbor. Build honest, love your waters, and always keep on the grass.
